

BlackCat Aviation Grant and Data Management System

Optimize your grant and data management with BlackCat Aviation. Our flexible, cloud-based system is tailored specifically for state aviation organizations, offering a comprehensive solution that simplifies federal reporting and automates grant and facility data management.

Designed to enhance efficiency for state departments of transportation, BlackCat Aviation covers everything from facility data collection and 5010 inspections to Capital Improvement Plan development and application processing. Manage grants, contracts, payments, critical documentation, and inventory seamlessly while providing comprehensive state and federal program management and compliance tracking.

Optimize your state aviation data collection and grant management processes with key features designed to enhance efficiency and accuracy:

- Facility data collection and maintenance
- Dynamically created airport directory
- Operational data (statistics) collection
- Funding, contracts, reimbursements, and payments
- Electronic interface to send/receive FAA inspection data
- Organization contact and user management
- Notifications integrated into the system workflow
- Project scoring and ranking
- State and Federal program management
- Organization contact and user management
- Project management
- Project Compliance tracking
- Document management
- State and 5010 airport inspections
- Application development and collection
- Mass email and contact management
- Client and end-user training and support
- CIP development
- Equipment inventory
- Reporting

Optional Modules and Services: Air Service, Aircraft Registration, Airport Inspection, Disaster Preparedness, Gaming, Quality Assurance Review, System Planning, eSignature, Custom Interfaces & Integrations, and Legacy Data Migration Services

Why BlackCat?

- **Make Better Safety and Funding Decisions** - BlackCat Aviation's efficient workflows and fund management processes ensure your agency can make better funding decisions for projects to improve airport safety and maintenance.
- **Simplify Federal Reporting Requirements** - Uniform and timely data collection results in consistent and accurate federal reporting capabilities.
- **Address Data Collection and Processing Needs** - Allows the state to collect, maintain, analyze, and report on a comprehensive amount of data relating to the airport facilities, activities, projects and funding.
- **Identify the Best Funding Options and Scenarios** - Data that relates to airport maintenance, safety, capacity, and priority is collected, which results in your state's ability to make more practical and precise funding decisions.
- **Comply with Federal and State Regulatory Requirements** - Airport inspection and project compliance monitoring components ensure that deficiencies are identified and mitigated and that all projects leveraging federal funding are managed with the proper oversight.
- **Gain Consistent Transparency between State and Airport Stakeholders** - Users can access the same data within the system to give recipient users more access and visibility to the critical data and prioritization associated with state funding and compliance activities.

About B2Gnow

B2Gnow delivers leading software solutions that promote accountability, transparency, and compliance in public and private contracting. For over 25 years, agencies across North America, including federal, state, local, education, and Fortune 500 organizations have relied on B2Gnow to manage complex compliance programs. Its integrated platform includes B2Gnow for vendor management, certification, goal tracking, and DBE/MBE/SBE/WBE compliance reporting, eComply for prevailing wage and workforce reporting, and BlackCat for grant management and project oversight. Purpose-built for infrastructure projects, B2Gnow's technology enhances transparency, reduces risk, and strengthens communities. Learn more at www.b2gnow.com.
