

eComply Labor Compliance Solution

B2Gnow's eComply Labor Compliance solution offers contract owners and contractors a digitized way to efficiently track and monitor worker wages, hours, and onsite conditions. eComply validates the data and measures against goals and compliance regulations to ensure clients are always audit ready.

Compliance Management

- > Prevailing wage rates management at no additional cost
- > Automated comparison of Certified Payroll Reports (CPR) to the prevailing wage and flag discrepancies
- > Track workforce utilization and measure against set goals
- > Monitor apprentice to journeymen ratios and apprentice certifications

FieldInspector Application

- > Compatible with smart phones, tablets, and laptops
- > Works with or without live internet. Syncs to the system once in range
- > Compare onsite activities to submitted CPRs. Discrepancies are flagged for correction
- > Upload photos of onsite workers and compare to photos in the system

FieldReporter Application

- > Digitize daily onsite sign-in and sign-out, eliminating handwritten notes and duplicative data entry
- > Ensure that sign-in information is captured and updated in real-time and syncs with the core system
- > Fully integrates with the Compliance Management and FieldInspector modules
- > Simultaneously handles data from multiple construction sites

The cloud-based SaaS platform offers a scalable and secure solution for prevailing wage compliance and workforce reporting. Key features include:

- Real-time dashboards for quick, at-a-glance viewing
- 160+ standard reports plus ad hoc reports via Open Data Protocol (oData)
- Automated compliance and audit readiness
- Accurate wage determination based on current laws
- Subcontractor compliance tracking and verification
- Efficient data management to reduce administrative tasks
- Seamless integration with B2Gnow for unified workflows
- Flexible user permissions for data security
- Intuitive, customizable interface for ease of use
- Expert support and training for successful onboarding and issue resolution

eComply Solution

A Quick Overview

This robust cloud-based application ensures prevailing wage compliance and workforce reporting, keeping organizations always in compliance and audit-ready. With tight integration into B2Gnow, it offers unified data and reporting that streamline project compliance. Its simple, customizable interface allows for easy deployment across all stakeholders, while a responsive support team provides quick answers to keep projects moving smoothly.
